About Me

Seeking a beginner-level position to expand and develop my technical expertise earned at SABAC College over the previous four years. I graduated from The University of the Punjab with a BS (CS). In the front-end, I'm using HTML5, CSS3, and JavaScript, while in the back-end, I'm using Node.js.

Projects

Real-time Chat Application/NOV2021-Present

This is a real-time chat tool via which we may talk as a group. This application was built with node.js, express.js, and socket.io. In the future, I want to provide a date and time option.

Analog Clock/NOV2021-NOV2021

This is an analog clock which is made by using HTML5, CSS3 and JavaScript.

Login Form/AUG2021-Present

This is a login form project created with HTML5 and CSS3. I used pseudo selectors to make it semi-transparent. I also utilise animation and transitions to make it more visually appealing. In the future, I plan to connect it to a database to store data.

Other recent projects

- 1:Moving truck animation using HTML,CSS and JavaScript.
- 2:tic tac toe game.
- 3:figma design to HTML.
